L. N. Gumilev, KazATU. S. Seifullin, Kazutb.

The conference was opened with a welcoming speech by Kapaev Sauykbek Aripovich - head of the Department of CTRM MID RK in Astana. Congratulating those present on the holiday, he noted that the main goal of standardization is to ensure the comfort of living in the state by the methods of technical regulation. He also noted the relevance of the slogan of ISO "Standards make cities smarter" for the economy of Kazakhstan.

Vice-rector for social and cultural development of ENU them. L. N. Gumilev was presented by Dikhan Kamzabekuli and the Pro-rector on science and innovations of the Kazakh University of technology and business Elaman Aibuldinov was the role of universities in the development of the economy of Kazakhstan as forge technical personnel, the need for broad innovation. In particular, Dikhan Kamzabekuli emphasized the role of the Eurasian national University in the training of specialists in standardization and certification, as well as the fact that the formation of a "smart city" is used and research and development as PPP and students of ENU.

The Vice-rector of the Kazakh Institute of technology and business noted: "the very name of the event" Standards make cities smarter"says that there is a need for wide introduction of innovative technologies in all spheres of activity, and the University of technology and business builds its strategy on these priorities using the achievements in the field of technical regulation of both Kazakhstan and the international community".

Participation in the conference was attended by representatives of JSC "Center of development of Almaty city" Aliya Kozhabekova, JSC "Astana Innovations" Zhasulan Kenzhegaliev, "JSC "Zerde" Alzhan Abdrakhmanov, Department of IT projects of the LLP "Astana LRT" Danabek Kaliazhdarov. Concluding speech at the conference spoke Bakhytkul Baikhozhaeva, head of the Department "Standardization and certification" ENU them. L. N. Gumilev, doctor of technical Sciences, Professor. Stressing the importance of this event for students, she focused on the training of practitioners in the Department, the scientific directions of the Department. Bakhytkul Uzakovna noted in his speech: "the Department is working hard in this direction. There are scientific directions of the Department, scientific schools, students and undergraduates in their works cover the following problems:

- Smart technologies in construction,
- Smart technologies in education,
- Smart city and environmental issues,
- Smart technologies to ensure product quality and safety,
- Smart technologies in the social sphere.

And as an example – the scientific work of our undergraduate Iriszhan Zhaimanovoi. In its work, it proposes to introduce a system of warning consumers about dangerous products in Kazakhstan. And the work of our Department in the above areas is a contribution to the formation of the Smart city".

The solemn awarding and honoring of scientists and specialists who made a significant contribution to the development of Kazakhstan's system of technical regulation and training took place at the event.

Certificates of appreciation were presented.
